

# *the* Living Legacy Project

Honoring your memories with stories that will last forever

## Preserve your family history, stay connected, and save stress.

We work with assisted living facilities to gather your loved ones most precious life stories in long-form audio files.

We also work with you to gather photos/video for a loving and honoring memorial video to last generations.

## How It Works

1. **Choose Your Legacy Plan** – Select a 5, 15, or 30-minute Legacy Film. Once enrolled, we create your secure family portal and confirm your loved one's details.
2. **We Coordinate With the Facility** – We connect directly with your loved one's long-term care facility and schedule gentle, recurring memory-preservation sessions as part of their activities.
3. **Ongoing Memory Preservation Sessions** – Your loved one participates in calm, guided conversations about their life, memories, and meaningful moments. Families have access to full recordings as they become available.
4. **You Share Photos & Home Videos** – Upload photos, videos, and audio through your portal to help personalize and enrich the final film.
5. **We Craft & Deliver the Memorial Video** – We edit everything into a polished memorial film, delivered with a private download link you can share with family.
